ScienceDirect is the world's leading source for scientific, technical, and medical research. Explore journals, books and articles. Agonist Immunotherapy Targets April 11-12, 2019 Boston, MA Program | Stepping on the Gas with Costimulatory Agents The immunotherapies industry is currently dominated by antagonist antibodies such as PD-1 and CTLA-4. Quercetin, a dietary flavonoid used as a food supplement, showed powerful antioxidant effects in different cellular models. However, recent in vitro and in vivo studies in mammals have suggested a prooxidant effect of quercetin and described an A liposome is a spherical vesicle having at least one lipid bilayer. The liposome can be used as a vehicle for administration of nutrients and pharmaceutical drugs. Liposomes can be prepared by disrupting biological membranes (such as by sonication).
