

Download Intensive Care For Nurses,

Certified Nurses Day - March 19! Congratulations! The Canadian Association of Critical Care Nurses, your national specialty association, thanks and acknowledges you for pursuing and maintaining your Canadian Nurses Association certification in critical care. Intensive care medicine, or critical care medicine, is a branch of medicine concerned with the diagnosis and management of life-threatening conditions that may require sophisticated life support and intensive monitoring. Neonatal Intensive Care Nurses are in demand due to advances that have dramatically increased the survival rate of infants born with a low birth weight. An intensive care unit (ICU), also known as an intensive therapy unit or intensive treatment unit (ITU) or critical care unit (CCU), is a special department of a hospital or health care facility that provides intensive treatment medicine.
