Education has benefited from positive psychology since the field began. There is no standard for implementing the research findings of positive psychology into the classroom; however, there are many practices that can change the fabric of schools and their students for the better. Become a Science-Based Practitioner! The Positive Psychology toolkit is a science-based, online platform containing 135+ exercises, activities, interventions, questionnaires, assessments and scales. Considerable evidence supports this crucial conclusion: the differences in achievement observed between and among students of culturally and ethnically diverse backgrounds and students of mainstream backgrounds are not the result of differences in ability to learn. Different people respond better to different styles of leadership. To be a truly skilled leader, you must become aware of the needs of your staff, and adapt your leadership style to nurture and encourage their productivity and professional growth.
